

Race Sim Studio presents the **RSS Formula Hybrid 2020** car for Assetto Corsa.

If you have obtained this copy of the vehicle via illicit unpaid means, you are missing out on being up-to-date with our latest developments, improvements, updates, discounts and news. The support enables us to continue doing this work for you.

## Car Installation Instructions

Copy the '**content**' folder in this archive to:

c:\Program Files (x86)\Steam\steamapps\common\assetto corsa

This will ensure you have installed the cars, fonts, driver and the texture folders. If using the [Content Manager software](#), just drag and drop the zip file onto the software interface.

## Frequently Asked Questions

Full details for installation, car painting template information, tyre packs and any other frequently asked questions can be found on our [website](#).

## Additional Credits

[Klaas Norg Fotografie](#) – Official photographer, livery creation

[Precision Sim Engineering](#) – Official steering wheel and livery sponsors

Ilya Jusupov – The incredible Content Manager software

## Partners & Friends

During the development cycle of our car, we have collaborated with other groups connected to our world. We would like to say a special thanks to those listed below.

[Precision Sim Engineering](#) – Precision Sim Engineering produces industry-leading Steering Wheels for Motorsports Simulators.

[Content Manager](#) – A custom launcher and content management app for Assetto Corsa.

[RaceDepartment](#) – Our primary, and favourite, source of sim racing news, mods, and knowledge.

# Precision Sim Engineering GPX Steering Wheel
